

NIKHIL MANE

Game Programmer

[Pune, India | (+91) 9307489682 | manenikhil1234@gmail.com | [Portfolio](#) | [LinkedIn](#)]

SUMMARY

Game Programmer with 3+ years of professional experience, specializing in building gameplay mechanics and coding robust systems. Passionate about prototyping and refining mechanics for balance and polish.

TECHNICAL SKILLS

- **Languages:** C++, C#, HLSL, Python, HTML, JavaScript.
- **Engines & Tools:** Unreal Engine, Unity, Android Studio, Blender, Git/SVN, Photon, Firebase, Jira, Tortoise Git.
- **Core Competencies:** Gameplay Mechanics, AI Behavior Trees, Action Combat Mechanics, Object-Oriented Programming (OOP), Performance Optimization, Memory Profiling, Multiplayer Synchronization.

EXPERIENCE

Rendered Ideas Pvt. Ltd.

Mumbai, India

Game Developer L2

June 2023 - July 2024

- **Built and tested the core gameplay systems** for a first-person post-apocalyptic shooter, handling everything from the initial prototype to a successful Play Store launch.
- **Cleaned up the code and optimized the game** to hit a stable 60 FPS on the Amazon Firestick and mobile devices by refactoring update loops.
- **Worked with the 3D leads and animators** to get production-quality assets running smoothly, making sure the "game feel" was high-quality and consistent.

Avataris GMBH

Remote (Graz, Austria)

Game Programmer

May 2022 - June 2023

- **Implemented deep gameplay systems** for a Metaverse project, using strong Object-Oriented Design to keep the codebase clean and manageable.
- **Created custom tools for our designers** that allowed them to tweak and edit gameplay values on the fly, which cut down integration time by 30%.
- **Identified and fixed performance bottlenecks through profiling**, which led to a 20% boost in player engagement by keeping the world stable.

GOODSLEEP GAMES

Remote(Barcelona, Spain)

Gameplay Developer

July 2021 - April 2022

- **Managed the technical development of a VR title from scratch**, writing the logic for procedural worlds and building innovative interaction mechanics for VR controllers.
- **Set up the multiplayer architecture using Photon**, ensuring the networking was synchronized and lag-free for online players.
- **Optimized the UI and input handling**, which boosted player interest by 25% by making the interactions feel responsive and immersive.

EDUCATION

Seamedu School of Pro-Expressionism

Pune, India

BCA in Games & Mobile App Development

07/2019 - 08/2022
